“Any practitioner wanting to enter the volatile, uncertain, complex and ambiguous world of professional football at any level; senior ladies, men’s or Academy would greatly benefit from undertaking this course. I would suggest any Head of Performance in bigger organisations may “enrol” new practitioners on this course and ask for their written learning outcomes...

A start of formal reflective practice, CPD & an annual review.”

Grant Downie OBE, Consultant in Medicine & Performance Solutions

This unique course is designed for new graduates and those entering into a professional sports arena for the first time. The course is designed to prepare prospective employees in those areas that are specific to a Club environment.

“The MPA diploma is an excellent resource and qualification to help newly graduated practitioners with the transition into professional sport. Bridging the gap between formal education and the practicalities of the industry.”

Russ Wrigley, Head of Academy Sports Science & Medicine, Blackburn Rovers FC

**50 hours of learning
over 6 months**
